Vascular complications following liver transplantation

Tullio Piardi, Martin Lhuair, Onorina Bruno, Riccardo Memeo, Patrick Pessaux, Reza Kianmanesh, Daniele Sommacale

**Abstract**

Although vascular complications (VCs) following orthotopic liver transplantation (OLT) seldom occur, they are the most feared complications with a high incidence of both graft loss and mortality, as they compromise the blood flow of the transplant (either inflow or outflow). Diagnosis and therapeutic management of vascular complications constitute a
