### COMMENTS TO AUTHORS

REVIEW Review of "Vascular complications following liver transplantation" for possible publication in World Journal of Gastroenterology. Comments: In this review article, the authors describe the various vascular complications of orthotopic liver transplantation. The article describes the role of imaging and image-guided intervention in the management of these complications. It is a very well written and comprehensive review article here are my comments. General comments 1. The manuscript has several grammatical errors and spelling mistakes. The manuscript needs revision preferably by an author with English as native language to address these errors. Specific Comments: I. Abstract. 2. OK. II. Introduction 3. The introduction needs better organization since in the current format it seems to be mixture of facts. I would recommend the authors to organize the introduction as follows - vascular complications incidence, impact on OLT survival, value of early detection, role of imaging in management, management options for vascular complications, surgical role and role of interventional radiology. Though the current introduction does discuss all these points, the flow of thoughts is not coherent. III. Main manuscript 4. Too long. I would suggest the

authors to make the description more concise. In the current form the article reads more like a textbook chapter rather than a review article. V. References 5. OK VI. Tables and Figures 6. Figure 2 and 4. Please include if possible figures after endovascular intervention.
