Percutaneous Cryoablation for Liver Cancer

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC4521246>

Sep 15, 2014 - Based on the primary tumor site, **liver cancer** can be divided into two categories: (1) primary **liver cancer** and (2) metastatic **cancer** to the **liver** from a distant primary site. Guided **cryoablation** via many imaging methods induces iceball formation and tumor necrosis and is ...

Cryoablation of cardiophrenic angle lymph node metastases ...

<https://link.springer.com/article/10.1186/s13256-017-1313-4> ▾

Case presentation. Here, we **report** our initial experience with **cryoablation** of a cardiophrenic angle lymph node metastasis from **liver cancer**. As the cardiophrenic angle lymph node metastasis was located close to the heart, about 200 mL of 0.9% saline was injected into the pericardium to separate the heart from the target area.

Advances in cryoablation for pancreatic cancer

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC4716077>

Jan 14, 2016 - Currently, radical surgical resection is the only curative option but is only possible in 5%-25% of **cases**. The majority of patients present with unresectable pancreatic **cancer** and 40%-45% have metastatic **disease**, primarily **hepatic**. Consequently, the median survival rate is only 3-6 mo.
