COMMENTS TO AUTHORS

I have carefully read the manuscript. The argument is interesting, especially in relation to the fact that the lack of financial resources leads us to treat many diseases in the outpatient setting. The text is exhaustive and well-organized. The list of references is not complete. I think that tables and figures should be included in the text.

COMMENTS TO AUTHORS

Rubber band ligation is one of the most important, cost-effective and commonly used treatments of internal hemorrhoids. Hemorrhoidectomy showed better response rates, but it was associated with more complications and pain than RBL. 1. Patients selection of RBL 2. recurrence rate after RBL 3. LIMITATION AND CONTRAINDICATION OF RBL 4. Quality of life after RBL
