Treatment of pregnant women with a diagnosis of inflammatory bowel disease

Poturoglu S *et al.* Inflammatory bowel disease treatment in pregnancy

Sule Poturoglu, Asli Ciftcibasi Ormeci, Ali Erkan Duman

Abstract

The frequency of diagnosis of inflammatory bowel disease (IBD) has increased in younger populations. For this reason, pregnancy in patients with IBD is a topic of interest, warranting additional focus on disease management during this period. The main objective of this article is to summarize the latest findings and guidelines on the management of potential problems from pregnancy to the breastfeeding stage. Fertility is decreased in patients with active IBD. Disease remission prior to
