

新乡医学院实验动物伦理审批件

各位评审专家：

我院第一附属医院齐博同志申请的博士课题研究项目《miR-30a-3p/5p 表达失调促进食管鳞状细胞癌发生和发展的作用及分子机制研究》经过医学伦理委员会的审核，认为该研究的设计和实施方案科学、可行，实验动物处理过程均符合动物实验伦理的要求，同意申报博士课题研究项目。

Experimental Animal Ethical Inspection of Xinxiang Medical University

Distinguished experts:

The project “Down-regulation of miR-30a-3p/5p promotes esophageal squamous cell carcinoma cells proliferation by activating WNT signaling pathway” by the associate chief physician, QI Bo, of the First Affiliated Hospital of Xinxiang Medical University, has been ethical reviewed and is considered scientific and feasible with the design and implementation. The treating processes of the experimental animal meets the requirements of animal experimental ethics.
