

**Response to Assistant Editor comments:**

**Step 1: Is the general information on your manuscript correct? Yes**

**Step 2: 43049-Are the ORCID numbers correct? Yes**

**Step 3: 43049-Is the corresponding author's E-mail address correct? Yes, the other e-mail addresses have been corrected in the on-line application.**

**Step 4: 43049-Are the manuscript type and related ethics documents or statements correct? Yes; our institution does not require "informed consent" for single case reports where the information has been de-identified. We have uploaded the University guidance *in lieu* of a consent form.**

**The conflict of interest forms have been completed by all three authors; a single PDF file containing all three has been attached; the system does not allow uploading each COI form separately.**

**Step 5: 43049-Have all authors signed the BPG Copyright License Agreement? Yes; all three authors have signed it.**

**Response to Reviewers comments:**

- 1) An image of the biopsy will be added to the manuscript to show the presence of cirrhosis (it is being prepared but would not meet the deadline for resubmission).
- 2) More detail about the mutations of the SBDS gene of the patient has been added to the text of the manuscript.
- 3) The child was lost to follow up from 4 to 9 years of age, therefore we had no lab results for the time period mentioned above.
