SPECIFIC COMMENTS TO AUTHORS

This study explored the effect of timing theory combined with behavior change on self-efficacy, negative emotions and quality of life in patients with primipara. The study is well designed and the results are interesting. Comments: 1. Please change the manuscript type to Observational Study. 2. Some minor language polishing should be revised. 3. How about the limit of the study? Please make a short discussion about it. 4. Please update and edit the references.
