

April 25, 2013

Dear Editor,

Please find enclosed the edited manuscript in Word format (file name: WJG-2013 revised.doc).

Title: Total dysphagia after short course of systemic corticotherapy: Herpes Simplex Virus esophagitis

Author: Isa Jetté-Côté, Denise Ouellette, Claire Béliveau, Andrew Mitchell

Name of Journal: *World Journal of Gastroenterology*

ESPS Manuscript NO: 2054

The manuscript has been improved according to the suggestions of reviewers:

1 Discussion was corrected in order to consider the recurrence of COPD as a trigger itself for herpetic esophagitis.

2 An additional table with the laboratory confirmation of the herpetic infection was not included since clinical diagnostic was provided by histopathology, as demonstrated in figure 3.

Thank you again for publishing our manuscript in the *World Journal of Gastroenterology*.

Sincerely yours,

Isa Jetté-Côté
