

Dear reviewers:

Thanks for your review and your helpful comments. I have modified the article according to the suggestions of reviewers. Because of your suggestions, the revised article is better, and readers can get more valuable information.

1. I have uploaded the genetic test result of the inherited disease of the patient's blood system. Unfortunately, the patient did not have a homozygous exon genetic test before.

2. I have included other relevant case reports in the literature in the part of introduction.

3. The article was again polished by native speakers of English.

4. I have provided the approved grant application form(s) or funding agency copy of any approval document(s) and original pictures.

5. I have prepared and arranged the figures using PowerPoint.

6. I have provided the Signed Informed Consent Form(s) or Document(s) in our country.

Thank you and best wishes.

Yours Sincerely,

Yue Chen
