

RESPONSE REVIEWERS

February 13th, 2014

Dear Editor,

Please find enclosed the edited manuscript in Word format (file name: 7142-Review.doc).

Title: Systems biology approaches for studying the pathogenesis of non-alcoholic fatty liver disease

Author: Ciarán P Fisher, Nick J Plant, Andrzej M Kierzek and J. Bernadette Moore

Name of Journal: *World Journal of Gastroenterology*

ESPS Manuscript NO: 7142

The manuscript has been improved according to the suggestions of reviewers:

1. Formatting has been updated as requested.
2. The title of the manuscript has been shortened to 12 words to comply with the structure of a topic highlight.

We were delighted with the reviewer's positive comments on our manuscript and have made no other changes to the text. We agree with the reviewer that currently, there is very little use of systems biology approaches in this field and we too look forward to seeing more results published from such tools in the future.

Thank you again for publishing our manuscript in the *World Journal of Gastroenterology*.

Sincerely yours,

J. Bernadette Moore, PhD
