COMMENTS TO AUTHORS

In the manuscript "Advances in the endoscopic management of pancreatic collections" by Ruiz Clavijo et al., the authors review the management of pancreatic fluid collections during and following pancreatitis. It covers relevant issues and describes and discusses recent therapeutic approaches including indications and outcomes. Minor grammar and spelling errors should be corrected. Figure 1 should be checked for correct numbering of sub-figures A to D (does figure C really show an acute necrotic collection or a pseudocyst?).

COMMENTS TO AUTHORS

This is a well-constructed and informative review article. Only if some minor errors in English spelling are corrected, it would be worth publishing.

COMMENTS TO AUTHORS

In this review, the author summarized the treatment of pancreatic collections with endoscopic drainage, and its indications, outcomes, and the complications. The integrated and multidisciplinary management of pancreatic collections were also discussed. The comments about the endoscopic management of pancreatic collections were appropriate. The manuscript should be revised for some spelling errors, e.g. "Walled-off necrosis", "multidisciplinary management", etc.
