Title: Dietary Fiber Intake and Its Association with Diabetic Kidney Disease in US Adults with Diabetes: A Cross-Sectional Study

MS Number: 90857

The data for our study are derived from the National Health and Nutrition Examination Survey (NHANES), which is publicly accessible at <https://www.cdc.gov/nchs/nhanes/>. All participants completed informed consent forms before participating in the study. As our research involves a secondary analysis of original data, and the study population is drawn from various counties across the United States, providing informed consent documents in our country's language is impractical.
