COMMENTS TO AUTHORS

Contents are well writtended. There are some spelling mistakes. This paper has no Tables, no Figures, I strongly recommend to make some Tables of summarizing the results of reported papers. In fact, we can not understand the contents easily because of no Tables and no Figures.

COMMENTS TO AUTHORS

Thank you for the opportunity to review this paper. I believe many of the building blocks for a useful "perspectives" article on diagnosing and managing PSC are there but they can be better organized and presented.
