

Biostatistics Review Certificate

São Paulo

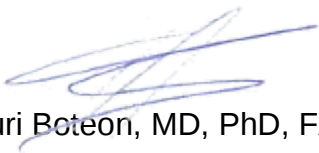

23rd November 2022

I confirm that the manuscript entitled “Extended criteria brain-dead organ donors: prevalence and impact on the utilisation of livers for transplantation” was analysed by the expert Biomedical Statistics Carolina Peçaibes de Oliveira of the NAP (Núcleo de Apoio ao Pesquisador) — Instituto Israelita de Ensino e Pesquisa Albert Einstein, São Paulo, SP, Brazil.

The title of the study in Portuguese was “Evolução temporal da prevalência de critérios de marginalidade entre os doadores de órgãos e de transplantes de fígado realizados com doadores de critério estendido”. The statistical review protocol number was N° SGPP: 4422.
