COMMENTS TO AUTHORS

Interesting idea, congratulations. The first video record is not possible to play, the second is of a very poor quality and four-years-old! You must have better videos after 4 years of experiments. Why do you not applied the new capsule on animal model (pigs for example) after such a long time? Capsule endoscopy on a porcine model is possible (see Tacheci et al, Dig Dis Sci - see the attachment) Which further experiments do you plan? Specify.

COMMENTS TO AUTHORS

It's an interesting paper, but it is not clear how the device helps in the location of the capsule.
