The manuscript has been improved according to the suggestions of reviewers:

1 Format has been updated

2 Revision has been made according to the suggestions of the reviewer

(1) I corrected the abstract according to the "BPG's revision policies for case report".

So, the abstract included more than 150 words.

(2) I inserted the comments.

(3) I discussed about the multicentric Castleman's disease. Because UCD is anatomical classification of involved LNs or organs, there is not special condition of UCD.

(4) So far, only two case have been reported to the literature. So I add these contents in introduction.

(5) I corrected paragraph about diagnosis.

And this paragraph included pathognomonic pathologic finding of hyaline-vascular variant UCD.

(6) My manuscript was revised by a native English speaker.

3 References and typesetting were corrected

Thank you again for publishing our manuscript in the *World Journal of Gastroenterology*.

Sincerely yours,
