Retrospective Study

Robotic resection of duodenal gastrointestinal stromal tumour: preliminary experience from a single centre

Zhou ZP *et al.* Robotic resection of duodenal gastrointestinal stromal tumor

Abstract

BACKGROUND

The experience of minimally invasive surgery in the treatment of duodenal gastrointestinal stromal tumours (DGISTs) is accumulating, but there is no consensus on the choice of surgical method.

AIM

The purpose of this study is to summarize the technique and feasibility of robotic

Including results for robotic resection of duodenal gastrointestinal stromal **tumors** preliminary experience from a single centre.

Do you want results only for Robotic resection of duodenal gastrointestinal stromal tumour: preliminary experience from a single centre?

Robot-assisted resection of gastrointestinal stromal ...

https://www.researchgate.net/publication/283640697_Robot-assisted_resection_of...

Background: Robotic techniques are claimed to be an alternative to laparoscopic and open approaches for gastrointestinal stromal tumors (GIST) treatment. Our aim is to present our single center...

Laparoscopy-assisted full-thickness resection of the ...

<https://onlinelibrary.wiley.com/doi/full/10.1111/ases.12377>

Introduction. Reports on laparoscopic local wedge resection (full-thickness resection) of duodenal gastrointestinal stromal tumors (D-GIST) are limited 1-4, despite the increased application of laparoscopic surgery in various fields. Although laparoscopic local wedge resection using a linear stapler is simple, this method can lead to excessive normal tissue removal, causing postoperative ...

Local Resection for Duodenal Gastrointestinal Stromal Tumors

<https://www.researchgate.net/publication/297587934...>

Background: Gastrointestinal stromal tumors (GIST) are the most frequent mesenchymal tumours in the digestive tract. The duodenal GIST (dGIST) is the rarest subtype, representing only 4-5% of all ...

(PDF) Surgical Strategy and Outcomes in Duodenal ...

<https://www.researchgate.net/publication/308092327...>

Background and objectives: Duodenal gastrointestinal stromal tumors (GISTs) are rare tumors that pose a surgical challenge, and long-term outcomes after resection have not been detailed outside of ...

Surgery for Duodenal Gastrointestinal Stromal Tumors: A ...

<https://link.springer.com/article/10.1007/s10620-017-4742-4> ▾

Sep 15, 2017 · **Gastrointestinal stromal tumors** (GISTs) are currently the most common mesenchymal malignancy of the **gastrointestinal** tract [1, 2]. Although GISTs can occur in any part of the **gastrointestinal** tract, the most common site is the **stomach** (50–60%), followed by the small intestine (20–30%), and rarely in the **duodenum** (5%) [3, 4]. **Duodenal** GISTs represent a rare subset, but they still account for ...
