COMMENTS TO AUTHORS

The manuscript is good and after the minor revision, I think that can be accepted.

COMMENTS TO AUTHORS

Well written. You could make some small changes and add some more data. 1-asthma: you could write some more about naso-bronchial reflex. 2-if it is possible find some papers about the african population and it's expression of IL-5 protein and you will make an almost global review.. 3-COPD:It is very good that you write "However, a recent study showed that sinonasal inflammation is not strictly related to COPD severity" and I believe it so. But writting down some more lines about it will be perfect! 4-Cystic fibrosis: If you could just mention the newer gene therapy(genes delivered with viruses). Very good review indeed!
