SPECIFIC COMMENTS TO AUTHORS

This manuscript by Somashekar G et al perform an analysis of the 2012 National Inpatient Sample to identify the 13 most common gastrointestinal (GI) diseases, and concluded that preventable and non-chronic GI disease contributed to a significant economic and health burden comparable to chronic GI conditions, providing a window of opportunity for improving healthcare delivery in reducing its burden. It is very interesting.

SPECIFIC COMMENTS TO AUTHORS

To be honest, I have no expertise in this topic as I am an oncologist. I would prefer to review papers that are related to my field GI CANCER. That said, this project is very unique as the authors did extensive review, data collection and analysis in an important topic GI diseases and found that there are many areas that can be improved to reduce the cost!
