COMMENTS TO AUTHORS

This review covers many aspects of hepatitis c, delving deep into pathogenetic mechanisms of the infection. Unfortunately, the review offers little in regards to novel medical knowledge and is submitted in a period that hepatitis c treatment is already reaching its peak, with current therapies achieving >95% SVR rates and research for new pharmacological regimens being put in a hold due to the efficacy of our current pharmacologic options.

COMMENTS TO AUTHORS

For better description, I would suggest to make changes in some sub-titles: 1. change “overviews on epidemiology of HCV” as “Introduction”; 2. change “Physiopathology of HCV Infection” as “Clinical manifestation of HCV Infection”. Also, the whole part of “Molecular Biology of HCV ” is better to put before “HCV Transmission Routes”.
