**Name of Journal:** *World Journal of Gastrointestinal Endoscopy*

**ESPS Manuscript NO:** 30013

**Manuscript Type:** Review

October 12, 2016

Dear Editor,

Pleased find enclosed the edited manuscript in Word format (file name: 30013.edited.doc)

**Title:** Endoluminal solutions to bariatric surgery complications: a review with a focus on technical aspects and results.

**Authors:** Raquel Souto-Rodríguez and María-Victoria Alvarez Sánchez

**Name of journal:** World Journal of Gastrointestinal Endoscopy

**Manuscript N°:** 30013

The manuscript has been improved according to the suggestions of reviewers:

- 1.- Format has been updated.
- 2.- The manuscript has been edited and a language polishing performed.
- 3.- Revision has been made according to the comments of the reviewer 00504581:

Thank you for your feedback. The increased risk of leaks after complicated LAGB has been commented on pages 11 to 12. A more expanded and detailed description of the different steps of the endoscopic internal drainage has been performed, as well as the way to treat chronic leaks connected to a not drained cavity is now described (pages 14 to 16 and pages 16 to 17 respectively).

3. - Revision has been also made according to the suggestions of the reviewer 03474095:

The epigraph about leaks after bariatric surgery has been amended with special emphasis on their management and new figures have been added.

4. - Response to reviewer 03647868:

The present article is a narrative review and we did not perform any statistical analysis. This is the reason why the P value and type of test have not been specified.

Thank you again for publishing our manuscript in World Journal of Gastrointestinal Endoscopy.

Sincerely yours,

Raquel Souto-Rodríguez MD
