Aggressive blood pressure treatment of hypertensive intracerebral hemorrhage may lead to global cerebral hypoperfusion: Case report and imaging perspective

Jose Gavito-Higuera, Rakesh Khatri, Ihtesham A Qureshi, Alberto Maud, Gustavo J Rodriguez

#### Abstract

Hypoperfusion injury related to blood pressure decrease in acute hypertensive intracerebral hemorrhage continues to be a controversial topic. Aggressive treatment is provided with the intent to stop the ongoing bleeding. However, there may be additional factors including autoregulation and increased

#### Match Overview
