Tale of fat and fib – cardiac lipoma managed with radiofrequency ablation: A case report

Swarna Sri Nalluru, Srinivas Nadadur, Nitin Trivedi, Sunita Trivedi, Sanjeev Goyal

Abstract

BACKGROUND

Cardiac lipoma and lipomatous hypertrophy of interatrial septum (LHIS) are very rare disorders with distinct pathological features. While cardiac lipoma is a well-circumscribed encapsulated tumor of mature adipocytes, LHIS is due to entrapment of

[Atrioesophageal fistula following ablation procedures for ...](#)

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC4567782>

Catheter ablation for atrial fibrillation (AF) is becoming a mainstream treatment particularly in patients with **paroxysmal AF** with severe symptomatology. As the number of procedures continues to rise, reports of one of the most devastating **complications, atrioesophageal fistula (AEF)**, have also ...

[Posterior Wall Isolation in Atrial Fibrillation Ablation](#)

www.innovationsincrm.com/cardiac-rhythm-management/...

Introduction

The Role of The Posterior Lef...

Challenges Involving Posteri...

Atrial fibrillation (AF) is the most common sustained arrhythmia in humans and is associated with significant morbidity and mortality. Furthermore, in recent years, the prevalence of AF has risen and is projected to increase threefold by 2050 as the population ages.¹ Catheter ablation improves quality of life in patients with AF and has emerged as either a first-line therapy option or as an alternative therapy in those patients with symptomatic AF refractory to medical therapy. Notably, the I...

Several research studies tell us that some doctors underestimate the impact Atrial Fibrillation has on a patient's quality of life. Many doctors treat **A-Fib** as a benign **heart** ailment. But patients **report** how **A-Fib** can wreak havoc in their lives. Responding to a survey, **A-Fib** patients said they do not want their healthcare providers to say:
