Abstract

96
Many recent studies have examined the importance of *Helicobacter pylori* (*H. pylori*) **11**
infection in the pathogenesis of the diseases outside the stomach and explored the
significance of this bacterium in the pathogenesis of some metabolic and cardiovas-
cular diseases. Recent **44** studies have provided evidence that *H. pylori* is also involved
in the pathogenesis of some liver diseases. Many observations have proved that *H.* **56**
pylori infection is important in the development of insulin resistance, NAFLD,
NASH, liver fibrosis and cirrhosis. The worsening of liver inflammation of different
