JOURNAL EDITOR-IN-CHIEF (ASSOCIATE EDITOR) COMMENTS TO AUTHORS

In this manuscript the authors retrospectively analyzed in 77 patients laparoscopic Roux-en-Y gastric bypass (LRYGB). side-to-side anastomosis of the lesser curvature of stomach and jejunum performed April 2012 - July 2015. The study has clinical implications e.g., for the treatment of obesity in patients with type 2 diabetes mellitus. The study is reasonably well performed, but since it is mostly focused on technical aspects of surgery I feel it would be more suitable for World Journal of Gastrointestinal Surgery.
