COMMENTS TO AUTHORS

Comments: 1. The content of this manuscript is not limited to the “neurodegenerative disorders”, so the title should be revised, such as “neurological disorders”. 2. One abstract of this review article should be added. 3. The manuscript is not organized smoothly and causes confusion to readers. Subtitles should be used to organize the manuscript. 4. The authors discussed the effects of BR1 and BR2 receptors in various neurological disorders. However, the receptors expression in neurons, glia cells and inflammatory cells in CNS were not mentioned. Also, the alteration of receptors expression under different pathological conditions should be discussed. 5. AngII has been shown to be both protective and detrimental in different neurological diseases. The authors should give their own possible explanations for such controversial results. 6. The manuscript should be proof-read carefully. There are several grammatical and spelling errors. For example, page 4, paragraph 3, line 2, “According some authors”, should be “according to some authors”.

COMMENTS TO AUTHORS

The article entitled "What have we learned about kallikrein-kinin and renin-angiotensin systems in neurodegenerative disorders?" by Maria da Gra?a Naffah-Mazzacoratti et al. . is a review regarding the role of RAS and KKS in several neurodegenerative diseases. There are several grammatical and typing mistakes.
