Optimal management for alcoholic liver disease: Conventional medications, natural therapy or combination?

Moon-Sun Kim, Madeleine Ong, Xianqin Qu

#### Abstract

Alcohol consumption is the principal factor in the pathogenesis of chronic liver diseases. Alcoholic liver disease (ALD) is defined by histological lesions on the liver that can range from simple hepatic steatosis (HS) to more advanced stages such as alcoholic steatohepatitis (ASH), cirrhosis, hepatocellular carcinoma (HCC) and liver failure. As one of the oldest forms of liver injury known to humans, ALD is still a leading cause of liver-related
