COMMENTS TO AUTHORS

This is a really interesting article. Methods are clear and results are well presented. Discussion is appropriate.

COMMENTS TO AUTHORS

This is a fairly well written case report of the diagnosis and treatment of a patient with Essential Mixed Cryoglobulinaemia (EMC). The publication of this article shall help to raise the awareness of this rare condition and I'd therefore recommend publication of this article in WJCC. Nonetheless, I'd also suggest some minor amendments in the manuscript: 1. The case report section needs some clarification. Were antibiotics given before or after the immunological work-up? Diagnosis of EMC was made after failure of such treatment. Did the authors made the diagnosis solely based on the immunological work-up or by exclusion, or both? 2. The references were not well listed. Some with no year of publication. Also different styles were observed e.g. Sep 26, Jan 28;379(9813):348-60, 2012;Volume 2012, Article ID 128382, 11 pages. The authors should not rely solely on the software in listing references.
