## SPECIFIC COMMENTS TO AUTHORS

This is a thorough review of the literature as it pertains to this important modality in prognosticating small bowel Crohn's. The charts and visuals are excellent. Although, this doesn't include histologic remission, it's a great review looking at endoscopic remission.

### SPECIFIC COMMENTS TO AUTHORS

This work comprises a systematic review of the role of CE has been applied in relation to assessment of mucosal healing in CD. **SPECIFIC COMMENTS 1.** The main focus of the MS was upon MH in CD. The first two parts of the search results did not relate to this

**Baishideng

**https://**www.wjgnet.com

focus. It would be more appropriate for the results to focus on the impact of CE upon MH after therapeutic intervention and perhaps on recurrence after resection. The first parts (tables 1 and 2) are not focused on these objectives 2. The INTRODUCTION is long. Some of the text here would be more appropriate in the DISCUSSION 3. The TITLE would read better as "Impact of small bowel capsule...." 4. In contrast, line 3 of the ABSTRACT would read better as "the SB" 5. In the aim of the ABSTRACT, that should be this 6. in regards the patterns of disease location (and with view of Paris vs Montreal) it would be appropriate to document that disease proximal to the ileum is present in at least 50% (if not >60%) of children. Much higher rates than those quotes here 7. the spelling of the term aphthoid is incorrect in the text \8. There are a number of minor errors of grammar or English language word usage
