COMMENTS TO AUTHORS

This paper shows perioperative management, especially in anesthesia, for pancreatic surgery. This paper is well written, however will require some changes before it can be accepted for publication. 1, Perioperative management including anesthesia contributes to recent good results of pancreaticoduodenectomy. However, recent advance in surgical techniques and management is also an important role for these results. Sorefore, this manuscript should be confined in the data about anesthesia. 2, Please shorten this manuscript, although this paper is well written,
