Medical treatment for gastro-entero-pancreatic neuroendocrine tumours

Rossana Berardi, Francesca Morgese, Mariangela Torniai, Agnese Savini, Stefano Partelli, Silvia Rinaldi, Miriam Caramanti, Consuelo Ferrini, Massimo Falconi, Stefano Cascinu

Abstract

Gastro-entero-pancreatic neuroendocrine represent a various family of rare tumours. Surgery is the first choice in neoplasms (GEP-NENs) repatients with localized disease whilst in the metastatic setting many other treatment options are available. Somatostatin analogues (SSA) are indicated for symptoms control in functioning tumours. Furthermore they may be effective to inhibit tumour progression. GEP-NENs pathogenesis has been extensively
