COMMENTS TO AUTHORS

The manuscript described a case of diffuse large B-cell lymphoma involving the heart, in particular, affecting the tricuspid valve. Clinical features were clearly illustrated. Specific comments as follows: 1. please state the contribution of both author to this manuscript. 2. The exact identity of the "tumor mass" on tricuspid valve is questionable. Resolution after treatment and the lack of use of coagulation were used as evidence of lymphomatous deposit. The possibility that this nodule can still be vegetation should be stressed. 3. Figure 3 is not essential. 4. It is not clear how long have this patient been followed up. Please state this clearly in the history or discussion.
