ESPS PEER REVIEW REPORT

Name of journal: World Journal of Gastroenterology

ESPS manuscript NO: 10951

Title: Contrast-enhanced ultrasound (CEUS) findings in portal venous system aneurysms: a multi-centre, case series study

Reviewer code: 00159291

Science editor: Su-Xin Gou

Date sent for review: 2014-04-29 09:47

Date reviewed: 2014-05-02 23:42

COMMENTS TO AUTHORS

1.Abstract: I think you will write conclusion for the discussion. 2.Introduction: you should give more explanation about the benefits of using Contrast enhanced ultrasound. There are some many researches to talk about the using of CEUS for example: evaluation portal blood flow by CEUS, the value of CEUS for focal liver lesion. 3.Material Methods: please write the time of the study. 4.In discussion, I think you had better to explore the correlation of clinical data with the results of CEUS Findings. In discussion, you write: "To the best of our knowledge, however, no CEUS pattern has so far been described in the literature". Please explain more about this, because many data mention about using CEUS for hepatobiliary and portal vein problem.
