

PEER-REVIEW REPORT

Name of journal: *World Journal of Clinical Cases*

Manuscript NO: 88054

Title: Research progress on perioperative nursing care for hip arthroplasty patients with concomitant hypertension

Provenance and peer review: Unsolicited Manuscript; Externally peer reviewed

Peer-review model: Single blind

Reviewer's code: 06086875

Position: Peer Reviewer

Academic degree: MD

Professional title: Assistant Professor, Research Associate

Reviewer's Country/Territory: India

Author's Country/Territory: China

Manuscript submission date: 2023-09-21

Reviewer chosen by: AI Technique

Reviewer accepted review: 2023-09-25 07:13

Reviewer performed review: 2023-10-08 09:30

Review time: 13 Days and 2 Hours

SPECIFIC COMMENTS TO AUTHORS

Hip arthroplasty involves replacing a damaged hip socket or femoral head with an artificial joint, thereby restoring the structural integrity and function of the patient's hip joint. Strengthening perioperative rehabilitation and nursing care for patients may greatly impact postoperative recovery including hip joint function rehabilitation, complication reduction, and quality of life improvement. In this review, the authors reviewed the research progress in perioperative nursing care for patients with concomitant hypertension who underwent hip arthroplasty including the preoperative, perioperative, and postoperative periods. This review is very well written, and it can further improve the quality of life of patients following hip arthroplasty. The image should be improved, and after a minor editing of the manuscript, it can be accepted for publication.
