

Michael F Byrne, MD, Series Editor

A potpourri of pancreatic issues

In this issue of *World Journal of Gastroenterology*, we present a series of articles relating to various aspects of pancreatic disease. Overall, our understanding of the etiology of pancreatic disease is improving, and there is much more of a move towards reserving endoscopic retrograde cholangiopancreatography (ERCP) for cases in which endotherapy is likely and utilising other less invasive modalities such as EUS. In this series, Branch *et al* discuss the utility of ERCP in the evaluation and management of acute pancreatitis, focusing on the need to move away from diagnostic ERCP. With this in mind, Gerke *et al* present an update on the role of EUS in pancreatic disease. What we do for the truly idiopathic pancreatitis population has been the subject of a large body of literature over the last few years and is highlighted here by the paper of Enns *et al*. The perpetually contentious disease process of sphincter of Oddi dysfunction is explored here by Mitchell *et al* and provides some food for thought as to who should be doing manometry and which patients should be exposed to this potentially curative but also risky procedure. Byrne *et al* focus on the emerging burden presented by autoimmune pancreatitis, a condition undoubtedly missed in the past and often confused for pancreatic cancer. Freeman tickles our fancy with some revelations in to the pancreatic endocrine and exocrine manifestations of pancreatic disease. Finally, Meloche presents a delightful review of the current state of play in relation to pancreatic transplantation for type 1 diabetes mellitus.

This is a somewhat mixed bag of topics but hopefully serves to remind us that there are a number of considerations in pancreatic disease, that we have more therapeutic options, safer imaging, and that we have a lot more to learn.

- 6296 Review of idiopathic pancreatitis
 Lee JK, Enns R

- 6314 Role of endoscopic retrograde cholangiopancreatography in acute pancreatitis
 Canlas KR, Branch MS

- 6321 Utility of endoscopic ultrasound in pancreatitis: A review
 Rizk MK, Gerke H

- 6327 Autoimmune pancreatitis: A review
 Zandieh I, Byrne MF

- 6333 Sphincter of Oddi dysfunction and pancreatitis
 McLoughlin MT, Mitchell RMS

- 6344 Pancreatic endocrine and exocrine changes in celiac disease
 Freeman HJ

- 6347 Transplantation for the treatment of type 1 diabetes
 Meloche RM
