

World Journal of *Clinical Oncology*

World J Clin Oncol 2023 June 24; 14(6): 215-229

ORIGINAL ARTICLE**Observational Study**

- 215 Hyperthermia combined with chemotherapy *vs* chemotherapy in patients with advanced pancreatic cancer: A multicenter retrospective observational comparative study

Fiorentini G, Sarti D, Mambrini A, Hammarberg Ferri I, Bonucci M, Sciacca PG, Ballerini M, Bonanno S, Milandri C, Nani R, Guadagni S, Dentico P, Fiorentini C

CORRECTION

- 227 Correction: Propensity-matched analysis of patients with intrahepatic cholangiocarcinoma or mixed hepatocellular-cholangiocarcinoma and hepatocellular carcinoma undergoing a liver transplant

Brandão ABM, Rodriguez S, Fleck Jr AM, Marroni CA, Wagner MB, Hörbe A, Fernandes MV, Cerski CT, Coral GP

ABOUT COVER

Editorial Board Member of *World Journal of Clinical Oncology*, Rania Mohammed Hathout, PhD, Professor, Department of Pharmaceutics and Industrial Pharmacy, Faculty of Pharmacy, Ain Shams University, African Union Organization Street, Abbassia, Cairo 11566, Egypt. rania.hathout@pharma.asu.edu.eg

AIMS AND SCOPE

The primary aim of *World Journal of Clinical Oncology* (WJCO, *World J Clin Oncol*) is to provide scholars and readers from various fields of oncology with a platform to publish high-quality basic and clinical research articles and communicate their research findings online.

WJCO mainly publishes articles reporting research results and findings obtained in the field of oncology and covering a wide range of topics including art of oncology, biology of neoplasia, breast cancer, cancer prevention and control, cancer-related complications, diagnosis in oncology, gastrointestinal cancer, genetic testing for cancer, gynecologic cancer, head and neck cancer, hematologic malignancy, lung cancer, melanoma, molecular oncology, neurooncology, palliative and supportive care, pediatric oncology, surgical oncology, translational oncology, and urologic oncology.

INDEXING/ABSTRACTING

The WJCO is now abstracted and indexed in PubMed, PubMed Central, Emerging Sources Citation Index (Web of Science), Reference Citation Analysis, China National Knowledge Infrastructure, China Science and Technology Journal Database, and Superstar Journals Database. The 2022 edition of Journal Citation Reports® cites the 2021 Journal Citation Indicator (JCI) for WJCO as 0.35.

Abstract

Rereading the article "Propensity-matched analysis of patients with intrahepatic cholangiocarcinoma or mixed hepatocellular-cholangiocarcinoma and hepatocellular carcinoma undergoing a liver transplant" (DOI: 10.5306/wjco.v13.i8.688), published on August 24, we observe, with concern, that figures 3 and 4 are wrong. The authors have attached the correct figures for correction.

Key Words: Cholangiocarcinoma; Hepatocellular carcinoma; Liver; Prognosis; Recurrence; Survival analysis; Correction

TO THE EDITOR

Rereading our article “Propensity-matched analysis of patients with intrahepatic cholangiocarcinoma or mixed hepatocellular-cholangiocarcinoma and hepatocellular carcinoma undergoing a liver transplant” [1] (DOI: 10.5306/wjco.v13.i8.688), published on August 24, we observe, with concern, that figures 3 and 4 are wrong. At some point, we have mistakenly forwarded a wrong file. Therefore, we attach the correct figures for correction (Figures 1 and 2). We hope that it will be possible to replace the wrong figures with the correct ones and that this process will not be difficult. We apologize in advance for this unfortunate mistake. Of note, correction does not change the interpretation of results or conclusion.

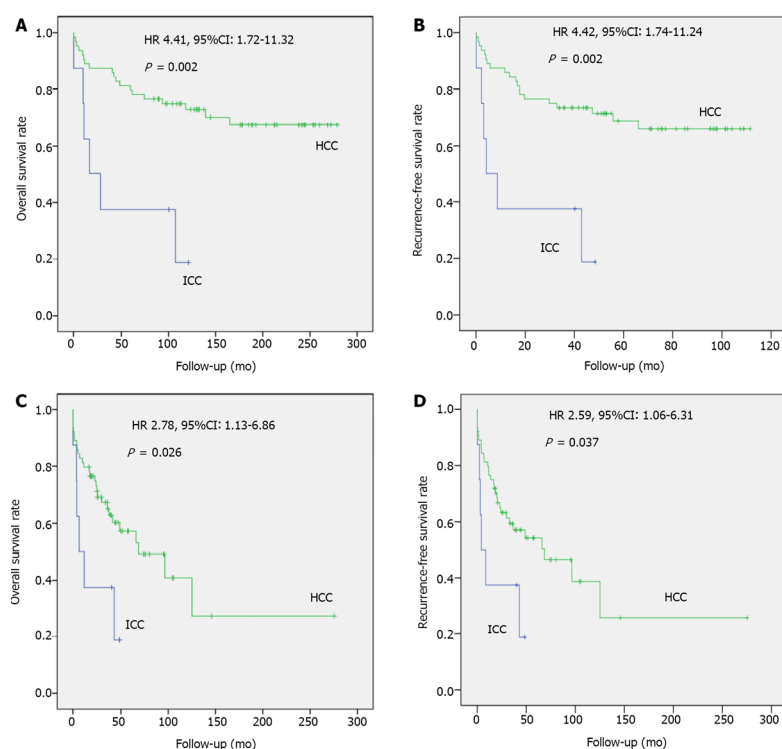

Figure 1 Corrected “Figure 3”. A-D: Kaplan-Meier curves representing post-liver transplant overall survival and recurrence-free survival in patients with intrahepatic cholangiocarcinoma (ICC) compared with patients with hepatocellular carcinoma (HCC), matched 1:8 for pretransplant tumor characteristics (A and B) and posttransplant tumor characteristics (C and D). HRs: Hazard ratios; CI: Confidence interval.

Figure 2 Corrected “Figure 4”. A-D: Kaplan-Meier curves representing post-liver transplant overall survival and recurrence-free survival in patients with mixed hepatocellular-cholangiocarcinoma (HCC-CC) compared with patients with HCC, matched 1:8 for pretransplant tumor characteristics (A and B) and posttransplant tumor characteristics (C and D). HRs: Hazard ratios; CI: Confidence interval.
