Case of Fitz-Hugh-Curtis Syndrome in male without presentation of sexually transmitted disease

Ha Ram Yi, Chan Sup Shim, Gyu Won Kim, Jung Seok Kim, In Zoo Choi

Abstract

Fitz-Hugh-Curtis syndrome is a type of perihepatitis that causes liver capsular infection without infecting the hepatic parenchyma or pelvis. Fitz-Hugh-Curtis syndrome is known to occur commonly in women of childbearing age who do not use oral contraceptives and have sexual partners older than 25 years of age. However, the syndrome has been reported to occur rarely in males. The clinical
