Nasobronchial interaction

Cemal Cingi, Nuray Bayar Muluk, Bengu Cobanoglu, Tolgahan Çatli, Oğuzhan Dikici

Abstract

Upper and lower airways can be considered as a unified morphofunctional unit. In this paper, nasobronchial interactions are evaluated based on literature. To discuss nasobronchial interactions, literature review from PubMed since 1982 is evaluated. Data base was including the terms 'nasobronchial interaction, nasal and bronchial'. Asthma and rhinosinusitis may be associated with environmental factors and immunological predisposition. Treatment of rhinosinusitis may decrease asthma
