Peristomal variceal bleeding treated by coil embolization using a percutaneous transhepatic approach

Macello José Sampaio Maciel, Osvaldo Ignácio Pereira, Joaquim Maurício da Motta Leal Filho, Enio Ziemiecki Junior, Susyanne de Lavor Cosme, Moisés Amâncio de Souza, Francisco Cesar Carnevale

### Abstract

Peristomal variceal bleeding due to portal hypertension is an entity that has rarely been reported with 3%-4% risk of death. A 68-year-old woman who had undergone a palliative colostomy (colorectal carcinoma) presented with a massive hemorrhage from the colostomy conduit. Considering her
