**Manuscript Type:** CASE REPORT

**Fulminant isolated cardiac sarcoidosis with pericardial effusion and acute heart failure:** **Challenging aspects of diagnosis and treatment**

### Abstract

This case report illustrates **challenging aspects of diagnosis and treatment of** isolated sarcoid heart disease (SHD) and the role of cardiovascular magnetic resonance (CMR) imaging. Here, we present a previously healthy 45-year old man, who was admitted with pericardial effusion and symptoms of acute heart failure. CMR followed by targeted left ventricular (LV) endomyocardial biopsy (EMB) revealed the diagnosis of
