Successful ¹endoscopic closure of a delayed colonic perforation in a patient who ingested a meal

Kazuya Inoki, Taku Sakamoto, Masau Sekiguchi, ⁵Masayoshi Yamada, Takeshi Nakajima, Takahisa Matsuda, and Yutaka Saito

Abstract

A 73-year-old man underwent endoscopic mucosal resection of a 20-mm flat elevated lesion on the transverse colon. He was asymptomatic the morning after the procedure but started to have severe right upper quadrant pain after
