Incidentally detected ⁶hydatid cyst of the adrenal gland: A case report

Sami Akbulut

Abstract

Hydatid cysts are a zoonotic disease that can involve many organs and tissues in the human body but primarily involve the liver and lungs. Of the main organs, adrenal glands are those seldom affected by hydatid cysts. ⁴The purpose of this study is to ³present a case with an incidentally detected hydatid cyst of the right adrenal gland. A 64-year old male patient was admitted to our outpatient clinic with complaints of sweating, palpitation and non-specific abdominal pain. Biochemical analysis of his
