Cystic jejunal duplication with Heinrich's type I ectopic pancreas, incidentally discovered in a patient with pancreatic tail neoplasm

Simona Gurzu, Tivadar Jr. Bara, Tivadar Bara, Annamaria Fetyko, Ioan Jung

### Abstract

The aim of this study was to present a case of enteric duplication cyst and criteria for a proper differential diagnosis. A 51-year-old male was hospitalized for pancreatic tail neoplasm and distal pancreatectomy with splenectomy was performed. During surgery, a 20x20x10 mm jejunal cystic lesion was incidentally detected and jejunectomy was performed. This well-defined cyst was firmly attached to the
