Name of Journal: *World Journal of Clinical Cases***ESPS Manuscript NO:** 29447**Manuscript Type:** Case Report**Intra-abdominal abscess and intractable sinus - a rare late complication after splenectomy****Badri Shrestha, James Hampton****Abstract**

Intra-abdominal abscess and an intractable abdominal wall sinus forty years after splenectomy is rare, which has not been described previously in the surgical literature. We report the management of a patient who had presented with an intractable sinus on his left hypochondrium forty years after having undergone splenectomy and cholecystectomy, which persisted for more than two years despite
