Comparison of bupivacaine and parecoxib for postoperative ...

<https://docksci.com/comparison-of-bupivacaine-and-parecoxib-for-postoperative-pain...> ▾

Effect of bupivacaine soaked gauze in postoperative pain relief in laparoscopic cholecystectomy: a prospective observational controlled trial in 120 patients. Comparison between lornoxicam quick-release and parecoxib for post-operative analgesia after laparoscopic cholecystectomy: A prospective randomized, placebo-controlled trial.

Enhanced Recovery Program Versus Traditional Care in ...

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC4779010>

Mar 03, 2016 · DISCUSSION. Meanwhile, laparoscopic hepatectomy is a minimally invasive surgery that causes less stress and trauma. It can improve patients' recovery and shorten their hospital stay and cost. Therefore, laparoscopic liver resection is an important part of the ERAS program in patients undergoing liver resection.
