## Severe Necrotizing Fasciitis in a Human Immunodeficiency ...

<https://jcm.asm.org/content/46/3/1144> ▼

Mar 01, 2008 · Methicillin-resistant **Staphylococcus aureus** (MRSA) is a rarely reported **cause** of **necrotizing fasciitis**. We report an unusually severe **case** of MRSA **necrotizing fasciitis** in a previously undiagnosed AIDS **patient**. Molecular analysis revealed that the strain had the USA300/ spa1 genotype, now an abundant **cause** of community-acquired MRSA infection.

## Cervical necrotizing fasciitis due to methicillin ...

<https://www.sciencedirect.com/science/article/pii/S090150271000113X>

Cervical necrotizing fasciitis is an uncommon but potentially fatal **infection** characterized by rapidly progressive, widespread **necrosis** of the superficial **fascia**. The authors report a **case** of **cervical necrotizing fasciitis** of odontogenic origin in a male with uncontrolled diabetes mellitus.

1 **Multidisciplinary treatment of a patient with necrotizing fasciitis caused by**  
 2 ***staphylococcus aureus*: A case report**

3  
 4 Li-Qian Xu, Xin-Xiu Zhao, Pei-Xia Wang, Ji Yang, Yun-Mei Yang

5  
 6 nfection that spreads quickly and is characterized by extensive necrosis of the  
 7 deep and superficial fascia resulting in the devascularization and necrosis of  
 8 associated tissues. Because of high morbidity and mortality, accurate diagnosis  
 9 and early treatment with adequate antibiotics and surgical intervention are  
 10 vital. And timely identification and treatment of complications are necessary to  
 11 improve survival of patient.

12  
 13 **CASE SUMMARY**

14 We report a case of necrotizing fasciitis caused by *Staphylococcus aureus* in a  
 15 patient using high doses of glucocorticoid and suffering from secondary  
 16 diabetes mellitus. He was admitted to our hospital duing to redness and  
 17 oedema of the lower limbs. After admission, necrotizing fasciitis of  
 18 *staphylococcus aureus* was considered, and he was discharged after b-ultrasound  
 19 drainage and multiple surgical operations. In the process of treatment, multiple  
 20 organ functions were damaged, but with the help of the Multi-Disciplinary  
 21 Treatment, the patient got better finally.

22  
 23 **CONCLUSION**

24 The key to successful management of necrotizing fasciitis is an early and  
 25 accurate diagnosis. The method of using vacuum sealing drainage in

### [Cervical necrotizing fasciitis due to methicillin ...](#)

<https://www.sciencedirect.com/science/article/pii/S090150271000113X>

Infections caused by methicillin-resistant *Staphylococcus aureus* (MRSA) are increasing and its resistance to most antibiotics makes **treatment** difficult. In previous studies on **cervical necrotizing fasciitis**, MRSA has not been reported as a pathogen. The authors report one case of **cervical necrotizing fasciitis and descending mediastinitis due to MRSA**
