Treatment of Thoracolumbar Fracture - PubMed Central (PMC)

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC4330209>

Feb 13, 2015 - The most common fractures of the spine are associated with the thoracolumbar junction. The goals of treatment of thoracolumbar fracture are leading to early mobilization and rehabilitation by restoring mechanical stability of fracture and inducing neurologic recovery, thereby enabling patients to return to the workplace.

Jul 26, 2019 - After surgical treatment, the fractures healed in all patients, and other surgery-related complications were not observed in the follow-up period. The patient who developed urinary dysfunction after surgery recovered in the third month after discharged, and his neurological function was improved from degree D to degree E 1 year after surgery.

Surgical treatment of multiple rib fractures and flail ...

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC4908779>

Jun 14, 2016 · **Surgical treatment of rib fractures** has received increasing attention in recent years. While previous studies have largely focused on the **treatment of flail chest**, it is not clearly defined if **patients with multiple rib fractures or dislocated ribs** also benefit from **surgery**.
