### Secondary hyperparathyroidism causing increased jaw bone ...

<https://www.sciencedirect.com/science/article/pii/S2212440317312026>

One such systemic cause may be endocrinologic in origin—that is, hyperparathyroidism. The parathyroid hormone (PTH) regulates serum calcium concentration and bone metabolism. In general, PTH attempts to elevate serum calcium levels by stimulating renal calcium reuptake, enteral calcium uptake, and bony calcium release.
