## Warfarin-Induced Skin Necrosis - PubMed Central (PMC)

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC4319805>

Dec 11, 2014 · Following the diagnosis of warfarin-induced skin necrosis, the patient was administered vitamin K intravenously and fresh frozen plasma (FFP) to reverse the effects of warfarin and promote protein C and S synthesis. Once the patient's INR was no longer supratherapeutic, subcutaneous enoxaparin was re-started as treatment for the known recent DVT.

## Successful treatment of warfarin-induced skin necrosis using oral rivaroxaban: A case report

Momoka Kamada, Tsuneaki Kenzaka

### Abstract

#### BACKGROUND

Heparin is commonly recommended for warfarin-induced skin necrosis; however, there is currently no established therapy for this disease. We present a serious case of warfarin-induced skin necrosis that was successfully treated with oral rivaroxaban, a factor Xa inhibitor.
